Summary

I'm a software engineer focused on building scalable web platforms using Node.js and TypeScript. I have extensive experience designing backend APIs, working with databases such as MongoDB and PostgreSQL, and utilizing DevOps tools like Docker and Kubernetes.

EXPERIENCE

Backend | Lesoll (Full-Time)

June 2023 - Present, **Cairo, Egypt** (On Site)

- Developed and maintained scalable backend services for the Lesoll platform & Egystay platform.
- Developed key features: Payment system (use PayMob and Amazon Payment Service (APS) as payment gateway), admin dashboard, user dashboard, chat system, notifications system, emails system, sms system (OTP system), traffic system (use puppeteer to scrape websites), CoHost system (allow users to host their properties), Cancellation policy system, booking system, reports, and employee tools
- Deployed and managed a Lesoll service using Docker, AWS EC2, and deployed and managed an Egystay service using Docker, AWS EKS, and Render

PROJECTS

Doc Station

[Project Link](#)

- Developed and maintained scalable backend services powering core Doc Station business operations and user-facing features.
- Designed and implemented high-performance, secure RESTful APIs consumed by web and mobile applications.
- Built and optimized booking, availability, pricing, and payment workflows with proper concurrency handling and validation.
- Integrated third-party services, including Amazon Payment Service, authentication providers, and real-time notifications using Socket.IO.
- Improved system performance and reliability through database query optimization, indexing, and background job processing.
- Implemented authentication, authorization, and role-based access control (RBAC).
- Set up and maintained Dockerized environments, CI/CD pipelines, and production deployments.
- Monitored, debugged, and resolved production issues, improving logging, error handling, and observability.
- Collaborated with frontend and mobile teams and contributed to architecture decisions and code reviews.

EDUCATION

Bachelor of Computer Science | Modern Academy – Maadi, Cairo

Egypt, Jul 2022

Technical Skills

- **Programming Languages:** HTML, CSS, JavaScript, TypeScript, and GoLang.
- **Backend:** Node.js, Express.js, NestJS, RESTful APIs, Monolithic Architecture, Microservices Architecture, JWT, OAuth, Redis, BullMQ, Prisma, Worker, exceljs, Swagger, Mongoose, and WebSockets (Socket.IO).
- **Frontend:** Vue.js, Vite, TailwindCSS, UnoCSS, Pinia, Firebase.
- **Database:** MongoDB, PostgreSQL, Database Design & Optimization, Transactions, and Indexing.
- **Cloud & DevOps:** AWS (EC2, S3, SQS, Route 53, CloudWatch, IAM, EKS, and ECR), Docker & Docker Compose, CI/CD (GitHub Actions), and Nginx.
- **Payments & Integrations:** Payment Gateway Integration (Amazon Payment Services & Paymob), and Webhook Handling.
- **Tools:** Docker, Nginx, Render, Netlify, Git/GitHub, GitHub Actions, Linux, MacOS, Postman, pnpm, Husky, Prettier, and Makefiles.
